

Public Notice
Town of Blackstone, Virginia
Emergency Procurement

On June 29, 2022, it was discovered that the peak generator for the Town of Blackstone was not functioning properly. The emergency shut off was immediately turned on and the generator was placed out of service. In order to provide proper electrical service to the Town's utility customers this generator must be serviced and repaired as soon as possible. The Town has issued a purchase order to Carter Machinery to fix this problem in the amount of \$218,968.18.

This contract is being awarded on an emergency basis due to the importance of the peak generator being able to run during the climatic environment of the summer.
